Alexandra Jaszkul

I'm a 4th year software engineering student with full-stack web-development experiences. I'm passionate about product and building applications that users will enjoy. Seeking an internship with a team where I can grow my skills and work on products to create a great user experience.

Work Experience

Uber • San Francisco, California • Jan - Apr 2019

Golang, Glue, Kafka, SQL, DOSA, Bash, Integration & Load Testing

Benefit Nudges	Enabled CRM to send benefit emails via Uber's IFTTT engine. Built endpoints, Kafka topics, performed database backfills.
Tier History Support	Provided support team to access user benefit tier history. Built endpoints in core & gateway services, database queries.

Uber (Eats) • New York, New York • May - Aug 2018

JavaScript, React Native, Redux, Sagas, Enzyme, Tape, Phabricator

Out Of Item	Added ability to notify users of order issues and handle modified orders. Anticipated to reduce order cancellations significantly.
Restaurant Dashboard	Scoped and implemented menu redesign. Executed and managed global code push deploys.
Wok	Added endpoint polling mechanism to internal web tool for gathering live courier location for map. Documented Here

Redbooth • Palo Alto, California • Sep - Dec 2017

Javascript, ReactJS, Rails, SCSS, Github, Jenkins, Docker

Customer Stories	Live at: Redbooth.com/Customers Front-end: Implemented designs using ReactJS. Back-end: Rails support for social media; other rails functionality changes.
Testing Pipeline	Discovered & documented process for running selenium tests locally. Debugged & fixed errors blocking tests from running in Jenkins.
Hackathon	Amazon Alexa skills for Redbooth.

Auvik Networks • Waterloo, Ontario • Jan - Apr 2017

Javascript, Backbone, Marionette, Scala, BitBucket

Meraki Cloud Controller	Investigated polling controller via SNMP vs REST API Designed & implemented front-end integration using JS and Backbone. Mapped data to internal model using Scala and NPL.
Other	Customizations to support abnormal network devices. Front-end bug fixes.

Manulife • Kitchener, Ontario • May - Aug 2016

PHP, C#, SQL, IIS, VBA/Macros

Baag File Generator	Designed & implemented PHP tool for converting word documents into custom-formatted HTML. Eliminated majority of 3rd party conversion costs. Configured PHP support on company servers.
Other	Performed database investigations in SQL and PHP. Bug fixing in C#.
